Run

```
1 // Online C compiler to run C program online
2 #include<stdio.h>
3 //Q2
4 int main() {
5     int a;
6     int b;
7     printf("enter a no a");
8     scanf("%d",&a);
9     printf("enter a no b");
10    scanf("%d",&b);
11    int temp;
12    temp = a;
13    a = b;
14    b = temp;
15    printf("the value of  of a is %d \n ",a);
16    printf("the value of  of b is %d \n ",b);
17    return 0;
18 }
19 }
```

Output

```
/tmp/ssokYzDvj7.o
enter a no a2
enter a no b9
the value of  of a is 9
the value of  of b is 2

=== Code Execution Successful ===
```

Run

```
1 // Online C compiler to run C program online
2 //Q3
3 #include<stdio.h>
4 int main() {
5     char studentid[10],studentname[10];
6     int marks1,marks2,marks3,obtainedmarks;
7     float percentageobtained;
8     printf("enter student id ");
9     scanf("%s",&studentid);
10    printf("enter student name ");
11    scanf("%s",&studentname);
12    printf("enter marks for subject 1 ");
13    scanf("%d",&marks1);
14    printf("enter marks for subject 2 ");
15    scanf("%d",&marks2);
16    printf("enter marks for subject 3 ");
17    scanf("%d",&marks3);
18    obtainedmarks = marks1 + marks2 + marks3;
19    percentageobtained = (obtainedmarks/300.0) * 100;
20    printf("student id is , %s\n",studentid);
21    printf("student name is , %s\n",studentname);
22    printf(" obtained marks is , %d\n",obtainedmarks);
23    printf("student id is , %f\n",percentageobtained);
24    return 0;
25 }
26
```

Output

```
/tmp/OIIfA28E5P.o
enter student id 24k0559
enter student name bazil
enter marks for subject 1 21
enter marks for subject 2 32
enter marks for subject 3 89
student id is , 24k0559
student name is , bazil
obtained marks is , 142
student id is , 47.333332
