## **Abstract**

This research paper will provide detailed information and will answer the most frequently asked qs about an important matter known as Palestine - israel conflict. This paper will answer questions raised by the people like why Israel has an interest in capturing Palestine's homelands. Reasons that forced Palestinian groups to launch an attack on Israel?. Also, this addresses the qs of why Palestinian's demand for a separate homeland is valid. This research paper has included several pieces of research that describe the topic in detail. Overall according to evidence collected during the making of the research paper, we come to a conclusion as to why there is a desperate need for a separate homeland for Palestinians with international unity. This paper will also discuss the current status of Palestinian lands and their economic situation. This paper will highlight the un resolutions importance of the two-state solution.

## **Methodology**

This research paper contains data, information and facts from different websites and international news organizations. Proofreading this research paper will asses the Palestinian's demands plus the current situation.

## **Results**

During the creation of the research paper when we assess the data on paper we can highlight that the creation of a separate homeland for Palestinians is necessary. It also highlights the difficulties faced by the Palestinians during the occupation that led to an enlightened spirit to fight against occupation.

## **CONCLUSION**

Our research concludes the importance of Palestinian demands that have constantly been ignored by the international community despite the UN resolutions that orders Israel to give lands to Palestinians that were occupied. This research concludes how important this issue is and how it can be resolved that is by accepting Palestinians' demand for a separate homeland this research paper worked on this demand and we concluded that the demand for a separate homeland is valid according to the facts collectively collected.

## **INTRODUCTION**

This topic highlights the significance of the topic as it describes the illegal occupation of Israel over Palestinian land since 1967. This issue started the British sectary Arthur Balfour wrote a letter in which he desired to create a separate country for Jewish people in Palestine where 90% of the population were Muslims. 31 years later these people were displaced from their homeland. Here we can quote on the brutal oppression done by Israel [ALJAZEERA,2023}. Here we can find that an Israeli soldier is asked about how many innocent people were killed in response he laughs and portrays it as he does not remember anything. This was a British initiative towards the creation of Israel as during worldwar1 Britishers promised for the creation of a country for jews and also asked orators to help against fighting their arch rivals later they fulfilled their promise. A movie was also documented [lawrans of ARABIA,1962] and later British control over Palestine as there were several minorities present like jews, europeanjews and other jews which saw Palestine as a escape due to the persecution of Europeans. In 1896 a book was published [THE ODDOR HARZIL,1896} in which he introduced the concept for a “jewish state” for that he later

organized a conference where a decision was made to establish a settlement in Palestine. They bought several lands in Palestine with Britishers supporting them. A large number of immigrants started to enter Palestine without asking the local residents of Palestine they started to build there army and this all was led by David mugerion. British started mass arrests, tortured Palestinians and confiscated weapons of Palestinians and this revolt continued till 1937 where 10% of the population was either killed or arrested. Later world War II changed the dynamics when many jews were been killed and British were frustrated with world war limai as they were now trying to escape the Palestinians as they didn't want to fight anymore so after 30 years of occupation britishers left. Later United Nations approved a plan of having 50% plus land for jews this lead to unrest among the Arabs that led to different arab – Israel wars that resulted in capturing of more lands by Israel that was assigned to Muslims by the UN. This lead to an increase in insecurity among the Palestinians as they wanted the rights of freedom and to build peace for Palestinians. Several resolutions have been passed by the UN and different countries but there is no development has been made on the demands of Palestinians and there is no one who is realizing the necessity of a separate homeland. This need has led to several uprising wars against Israel by Palestinians resistance such as the ongoing Israel – Palestine war that is going on since October 7 2023 which has resulted in massive civilian losses [Quoted Aljazeera] where 41,000 plus people have lost their lives due to the horrific campaign been lead by Israel to destroy civilians infrastructure. So as we understand the history of this topic we will know discuss in detail that why there is a necessity for a two-state solution. Also we will later discuss why Israel is persecuting Palestinians ? and how will this conflict be resolved.

### **Purpose and Significance:**

This topic has much significance as it shapes the ongoing situation in middle east and this lead to numerous state actors like usa and the Arabs. As we discussed the horrific Nagba event this tells the actions taken to bypass the rights for people. This raises human right issues as how the people are treated despite this is there originated homeland.

In addition to this the purpose to research on this topic is to tell the international community for the importance of this topic and to show the path for the solution of this conflict.

### **LITERATURE REVIEW**

As we move on we will now discuss the different views on the two-state solution. This will help us to decide that what is the best possible solution for having a continuous peace between them. As we discussed earlier a1fter British departure Israel has used its power to capture different Palestinian cities like West bank, Hafia , and other important cities. This led to what is called as “NAGBA” where several Palestinians had to leave their homeland this led to several economic crises and restrictions been placed by Israel on them so that’s why it is a continuous demand by the Palestinian people for a 2 state solution. Let's analyze it. In Norway between Israel and PLO (Palestinians liberation Organization) an agreement was signed known as the Oslo Agreement where both parties accepted each other this was thought to be a turning point where it could lead to a 2 state solution which was the main Palestinians demand but it could not stay for too long as Israel continued to builds its settlements on Palestinians lands. This led to more frustration among Palestinians regarding the future of there

beloved homeland. Also, there was much opposition against this agreement on both sides which led to the killing of the head of Israel. This eventually led to creation of several armed groups among Palestinians who could build their rights like Hamas, Islamic jihad who had started to carry out suicide attacks in Israel . Different government ministers visited Al-Aqsa mosque which led to several riots and mass protests. Israel used its military power as a weapon against Palestinians There were still different conferences held to build peace but it couldn't succeeded. Israel continued with its point of view that it considers all Palestinian groups as terrorist. Hence different countries too supported the point of view of Israel that tried to undermine Palestinian's resistance against occupation. Israel is not agreeing on giving rights to Palestinians this was the main reason that led to October 7 when a surprise attack was launched against Israel by Palestinians groups and this war has been going since 1 year as we discussed. However, Israel continues with its point of view to destroy Gaza and kill as much Palestinians so it cannot face resistance from them.

Different rulings like the ruling from ICJ (international court of Justice) called for an immediate end to Israel's illegal occupation. This ruling had contained a path for a two-state solution. In this ICJ discussed that illegal occupation is not conditional upon bilateral peace process. Also realizing the necessity of 2 two-state solution several countries voted in favor of un for a separate homeland for the Palestinian people.

According to an scholar LanLustick that highlights that the 2 state solution was once widely saw this as a necessary compromise by the international community. It can be highlighted in this context that us made several peace contracts with Israel with several Arab states like Jordan, Egypt etc.

Also researchers like RashidKhaldi argue that the 2 state solution has tracing roots to un-resolution on 2 state solutions.

Different criticism is raised on the state solution is that different scholars raise the concerns about Israel's expansion of territories in various parts of the west bank According to recent facts shared by Aljazeera 10,000+ Palestinians are in Israeli jail despite no criminal record. Also, several Palestinian scholars like Edward were against Oslo Accords and raised questions on its outcomes as it didn't raise the core issues under which timeline how Israel will give occupied lands back to Palestinians with no detail explanation of the control of east Jerusalem.

But there are several questions raised by experts that whether a 2 state solution is practicable or not especially after the October 7 attacks.

And experts say that Palestinians want the occupation forces to leave their land from the green line. Nurudha a political activist describes that Palestinians live under strict occupation that whether they can travel within cities and their lives will be protected during it. So despite international pressure, Israel has continued on building its settlements thus creating two-state solutions impossible. Also, scholars like

Ali Abunimah (2006) supports one-state solution focusing that Palestinians and Israelis should live together with all the rights equally distributed among them.

### **Gaps in research :**

- **There is a lack of focus on developing realities :**  
The rise of Hamas as a political and military force for the Palestinians as it has created hope among Palestinians to resist occupation.

- **THE LACK OF FOCUS ON HUMANITARIAN CRISES :**

According to Human rights watch (HRW) said that Israel has laid a strict ban to restrict the supply of basic humanitarian things to Palestinians. It describes the situation as worst that told that 576,000 people suffer starvation and famine. This has laid the chances of effecting children's in Palestine.

- **No alternate plans for the Palestinians :**

Disregarding Palestinians desire for a separate homeland there is no progress in that with no alternate. There is too little research on alternate solutions such as one state solution . Few studies give a description on the needs of separate homeland like we can refer Abunimah Ali (2006) “ one country : A bold Proposal to end the Israeli- Palestinian impasse”. And Smith , Charles (2016) “The one – state solution : A study of feasibility and implementation “.

## **DISCUSSION :**

Israel – Palestine issue is deeply routed in terms of geopolitics, history, world order. We will continue previous section details by discussing in detail the necessary actions taken to build a independent state.

As we discussed earlier in the introduction part regarding the actions been taken by Israel in persecuting Palestinians like Nagba this showed us the challenges faced by the Palestinians As we discussed the different agreement's been try to made to bring peace among them.

Our researches describes that two state solution is only solution of Palestinians as both are of different religions so they have several differences among them that's why they will continue to resist against the occupation despite the challenges they will face .As we have already discussed the current Israel-Palestine war despite one year of brutal war against Palestinians they have remain steadfast . Our findings have worked more on several detailed subtopics which was not discussed in detail so that's why our research paper has highlighted the events in detail so that we can achieve a collective peace by highlighting the necessity and permanent actions.

## **CONCLUSION :**

Overall in this research paper, we discussed several topics related to Israel- Palestine. According to what we collected indicate the importance of a two-state solution with the Jerusalem as the main capital. It indicates the reasons why Palestinians demand for a separate homeland is valid. We discovered different agreements like Oslo to bring both sides close but we saw different results of these peace talks and the effects that were faced by Palestinians by the failure of these talks. My research will add extreme knowledge as this will help to understand this topic completely.

The future researchers must work on more details on solutions of the problems faced by Palestinians.
