

National University of Computer & Emerging Sciences, Karachi
Fall 2023, CS-Department
Mid-Term II

9th November, 2023; 10:00 am to 11:00 am

Course Code: SS1012	Course Name: Functional English
Instructor Name: Nazia Imam, Sameera Sultan, Sabeen Amjad, Huma Hafeez, & Sharmeen Ismail	
Student Roll No:	Section No:

Instructions:

- Return the question paper. ANSWER ALL THE QUESTIONS IN THE ANSWER COPY.
- Write only the answers in your answer copy after putting the correct question number.
- This question paper has 2 pages and 3 questions.

Time: 1 hour

Max Marks: 27

(Q1)/CLO2: Given below are FOUR thesis statements. Two thesis statements indicate the essay topic, author's assertion, and outline of the essay (sub-topics). However, other two thesis statements indicate the essay topic and the author's assertion only. Select any ONE thesis statement out of the four and do the following:

- a. Write three topic sentences, one for each sub-topic. In thesis statements that do not contain the sub-topics, brainstorm and identify relevant sub-topics first and then write your three topic sentences, one for each sub-topic. Write clear and forceful topic sentences. [6]
- b. Now, compose a body paragraph on any ONE of the topic sentences that you will have written. This paragraph should include at least 2 Main Points (MPs) and Supporting Detail (SD) for each of the MPs. The paragraph must also possess the essential elements of well-written academic paragraphs. [10]

Thesis Statements:

1. The cost of healthcare services for most people in the third world countries is unbearable due to low average incomes, high prices of essential medicines and lack of government-funded hospitals.
OR
2. The development of artificial intelligence (AI) chatbots in customer service has the potential to revolutionize customer interactions, provide personalized assistance and improve overall customer satisfaction.
OR
3. The experience of remote learning has transformed the traditional educational paradigms by posing unique challenges/ opportunities.
OR
4. Professional jealousy fosters a healthy professional ecosystem, driving individual and collective growth.

(Q2)/CLO2: Read the paragraphs and answer the questions below each of them. Put the correct paragraph number and write only the answers in your answer copy. [6]

Paragraph 1: (1) As you use your calendar to manage your time, think about how long certain activities will take. (2) A common mistake is to underestimate the time needed to do something, even something simple. (3) For example, when you are planning the time needed to get cash from the cash machine, remember that there may be a line of people. (4) Last week in line I met a woman I went to high school with, so we chatted. (5) It turns out she has two children just the same age as mine. (6) When you are estimating time for a more complex activity, such as reading a chapter in a textbook, block out more time

than you think you will need. (7) If you finish in less time than you have allotted, so much the better. (8) One should allow for interruptions because it is better to allow too much time than too little.

1. Which two sentences do not contribute to paragraph unity? Write the sentence numbers only.
2. Which sentence is an example of a supporting detail (evidence, elaboration, proof, etc.). Choose from the options below.
 - a. 8
 - b. 3
 - c. 2
3. Which sentence would be the best conclusion for the above paragraph?
 - a. Making your to-do-list requires careful consideration of the actual time every task would need for completion.
 - b. A study timetable must be practical.
 - c. Managing your time is no easy feat and needs to be taken seriously.

Paragraph 2: (1) Teachers should take steps to prevent students from cheating on exams. (2) To begin with, teachers should stop reusing old tests. (3) Even a test that has been used once is soon known on the student grapevine. (4) Students will check with their friends to find out, for example, what was on Dr. Thompson's biology final last term. (5) They may even manage to turn up a copy of the test itself, "accidentally" not turned in by a former student of Dr. Thompson's. (6) Teachers should also take some common sense precautions at test time. (7) They should make students separate themselves -- by at least one seat — during an exam, and they should watch the class closely. (8) The best place for the teacher to sit is in the rear of the room, so that a student is never sure if the teacher is looking at him or her. (9) Last of all, teachers must make it clear to students that there will be stiff penalties for cheating. (10) One of the problems with our school systems is a lack of discipline. (11) Teachers never used to give in to students' demands or put up with bad behavior, as they do today. (12) Anyone caught cheating should immediately receive a zero for the exam. (13) A person even suspected of cheating should be forced to take an alternative exam in the teacher's office.

1. Which two sentences do not contribute to paragraph unity? Write the sentence numbers only.
2. Which sentence mentions an example of a penalty that can be imposed on students caught cheating? Mention the sentence number only.
3. Which connector would be the best option to demonstrate the relationship between sentence 6 and the preceding discussion?
 - a. Indeed
 - b. Nevertheless
 - c. Second

(Q3)/CLO2: In the given paragraph, the link between ideas is missing. Read it closely to identify the missing link and use appropriate transitional expressions from the list to connect the ideas and show their relationship. You may not find all the connectors below to be useful. [5]

In particular	Subsequently	As a result	Next
However	Moreover	Initially	Nevertheless

Machine learning has revolutionized computer vision. _____¹, computer vision relied on handcrafted features. _____², with the advent of deep learning, the field transformed. _____³, convolutional neural networks (CNNs) have become the cornerstone of image recognition. _____⁴, the accuracy of computer vision systems has significantly improved. _____⁵ ongoing research aims to push the boundaries of what's possible in this field.

-----The End-----
