5. Other companies in our industry have successfully adopted this model. **F**

CLO 3: Demonstrate effective academic reading skills

Question 3-A: Read the following text carefully and select the most effective summarized version of it: [5 marks]

1. Text:

Tourism plays a vital role in boosting the economy of many countries. It generates employment, supports local businesses, and promotes cultural exchange. However, excessive tourism can strain natural resources, disrupt local communities, and harm the environment. Sustainable tourism, which emphasizes environmental protection and respect for local cultures, is a way to address these issues while continuing to benefit from tourism.

National University of Computer and Emerging

Summaries:

a) Tourism helps the economy by providing jobs and supporting businesses. However, it has no negative effects, making it an ideal industry for all countries.

b) Tourism mainly helps the economy by supporting businesses. The text focuses on how tourism should only be about cultural exchange and does not mention any environmental impact.

c) Tourism contributes to the economy through job creation and cultural exchange, but it can also harm natural resources and communities. Sustainable tourism offers solutions by balancing benefits and environmental protection.

2. Text:

Web development involves creating and maintaining websites, requiring knowledge of programming languages like HTML, CSS, and JavaScript. It can be divided into two areas: front-end development, which focuses on user interface and design, and back-end development, which handles server-side operations and databases. As technology evolves, web developers must keep updating their skills to meet modern web standards and user expectations.

Summaries:

a) Web development includes building and maintaining websites, involving front-end and back-end tasks. Developers need to learn multiple programming languages and adapt to new technologies.

b) Web development is about creating websites. Developers only need to know HTML and CSS to succeed in this field. The text emphasizes the importance of front-end design.

c) Web development is mainly about server-side operations and requires only JavaScript. Keeping up with new technologies is not necessary to meet user expectations.

The average prices per kilometer of clothing imported into the European Union from six different countries in 1993 and 2003 are shown in the bar chart below.

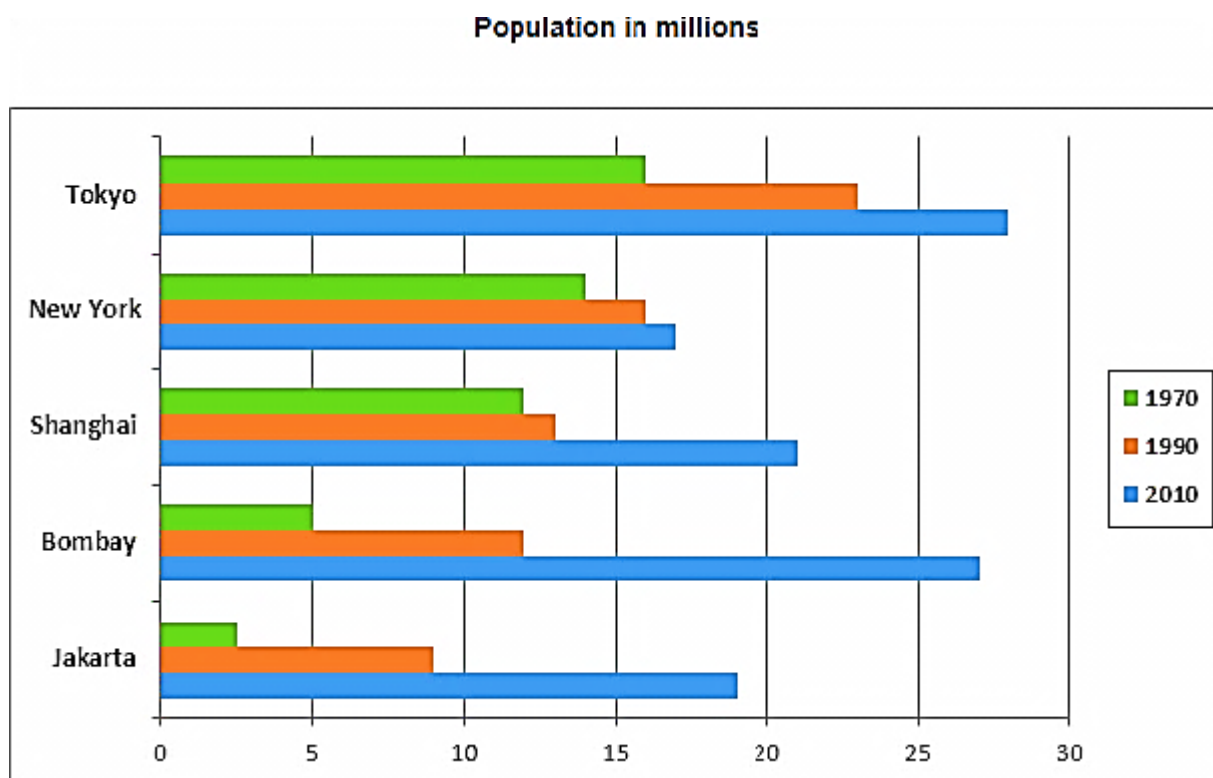

Question 3-B: After reviewing the given graph carefully, choose the right answer in your answer copy.

[10 Marks]
