SECTION 2 JAVA CODE:

```
const readline = require("prompt-sync")();

var tasks=[];

function Addtask()
{
    const Taskinfo = readline("enter task ");
    tasks.push(Taskinfo);
    console.log("Task are added sucessfully : "+ Taskinfo);
}

function removetask()
{
    const removeindex = readline("enter index on which task will be removed");
    if(removeindex >=0 && removeindex < tasks.length)
    {
        var remove = tasks.splice(removeindex,1);
        console.log("successfully removed : "+ remove);
    }
    else{
        console.log("invalid entry try ");
    }
}

function Displaytasks()
{
    console.log("list elements are :");
    for(var i =0; i< tasks.length;i++)
    {
        console.log((i+1)+":"+tasks[i]);
    }
}

function cleartasks()
{
    tasks = [];
    console.log("successfully cleared :");
}
```

```
function main()
{
    console.log("Start :");

    while(true)
    {
        const choice = readline("enter your choice among the following
add/remove/display/clear: in small letters");
        switch(choice)
        {
            case 'add':
                Addtask();
                break;
            case 'remove':
                removetask();
                break;
            case 'display':
                Displaytasks();
                break;
            case 'clear':
                cleartasks();
                break;

            case 'exit':
                console.log("thanks for your input bye");
                return;

            default:
                console.log("invalid input sorry try again");
                return;
        }
    }
}

main();
```
