

Course Code: CL-1000	Course: Introduction to Information and Communication Technology (IICT)
Instructor(s):	Yumna Asif

Task 1: Creating and Formatting a Table in MS Word

1. Create a 3x3 table in MS Word.
 2. Insert a row above the first row.
 3. Delete the last column of the table.
 4. Merge the cells in the first row.
 5. Apply shading to the second row with a light color.
 6. Take screenshot and paste it in a word file.
-

Task 2: Applying Borders and Page Layout

1. Apply borders to the table you created in Task 1.
 2. Add a header with the text "Lab 01: ICT Tasks".
 3. Add a footer with the page number centered at the bottom of the page.
 4. Insert a page border around the entire document.
 5. Take screenshot and paste it in a word file.
-

Task 3: Inserting Symbols and Equations in MS Word

1. Insert a symbol of your choice in the third cell of the first column of the table you created in Task 1.
 2. Below the table, insert the following equation:
$$x^2 + y^2 = z^2 + 2y - 3x$$
 3. Take screenshot and paste it in a word file.
-

Task 4: Inserting Images and Shapes

1. Insert an image of a computer below the equation in Task 3.
 2. Insert a rectangular shape next to the image, and add text inside it: "ICT Lab Task".
 3. Take screenshot and paste it in a word file.
-

Task 5: Insert Bullet Points

1. Type the following list of fruits:
 - Apples
 - Bananas
 - Oranges
 - Grapes
 - Pineapples
 2. In the **Paragraph** section, click on the **Bullets** icon to apply bullet points to the list.
 3. Take screenshot and paste it in a word file.
-

Task 6: Introduction to Formulas in MS Excel

1. In an Excel worksheet, enter the following values:
 - A1: 10
 - B1: 20
 - C1: 30
 2. In cell D1, create a formula that adds the values of A1, B1, and C1.
 3. In cell E1, create a formula that multiplies the result in D1 by 2.
 4. Go to formulas tab and click on this icon  to show formula and take screenshot and paste it in the word file.
-

Task 7: Creating Functions in MS Excel

1. Create a list of 10 numbers from (1-10) in cells A3 – A12
 2. Use the `SUM` function to calculate the total sum of these numbers in cell A13 and write SUM in cell B13.
 3. Use the `AVERAGE` function to find the average of these numbers in cell A14 and write Average in cell B14.
 4. Use the `MAX` function to find the highest number in cell A15 and write MAX in cell B15.
 5. Use the `MIN` function to find the lowest number in cell A16 and write MIN in cell B16.
 6. Go to formulas tab and click on this icon  to show formula and take screenshot and paste it in the word file.
-

Task 8: Logical Functions in MS Excel

1. In cells A19 to A25, enter a series of values:
 - 49
 - 55
 - 76
 - 82
 - 91
 - 43
 - 38
 2. In cell B19, use the `IF` function to display "Pass" if the value in A19 is greater than or equal to 50, otherwise display "Fail".
 3. Copy the formula in B19 down to B25.
 4. In cell C19, use the `AND` function to check if the value in A19 is greater than 50 *and* less than 100.
 5. In cell D19, use the `OR` function to check if the value in A19 is either less than 20 *or* greater than 80.
 6. Go to formulas tab and click on this icon  to show formula and take screenshot and paste it in the word file.
-

Task 9: Create a Simple Bar Chart in Excel

1. Enter the following data in columns A and B:
 - F1: "Item", G1: "Quantity"
 - F2: "Apples", G2: 50
 - F3: "Oranges", G3: 30
 - F4: "Bananas", G4: 20
 - F5: "Grapes", G5: 10
2. Create a bar chart using the above data.
3. Take screenshot and paste it in a word file.
