BODY PARAGRAPH

JAVERIYA AHMED HUSSAIN

Introduction To Body Paragraph

Body paragraphs are used in the main body of any piece of writing. They are the most important type of paragraphs as they contain all the information that the writer intends to convey.

Body Paragraph Structure

A body paragraph consists of the following components:

Topic Sentence (TS):

Informs about the topic of the paragraph. (the single controlling idea/aspect of the major topic).

Main Points (MP):

Inform, explain, elaborate, or further the TS.

Supporting Details (SD):

Support MPs. They can be examples, facts, statistics, evidence, etc.

Conclusion (Cncl):

Summarizes the ideas discussed in the paragraph. To write a conclusion, restate TS in different words and then ask for a response, evaluate topic, make suggestions, state prediction, link upcoming paragraph, etc.

Example

Topic Sentence

It is the incredible speed of computers, along with their memory capacity, which makes them so useful and valuable.

MP 1

Computers can solve problems in a fraction of the time it takes man.

SD 1 for MP1

For this reason, businesses use them to keep their accounts, and airline, railway, and bus companies use them to control ticket sales.

MP 2

As for memory, modern computers can store information with high accuracy and reliability.

SD 1 for MP2

A computer can put data into its memory and retrieve it again in a few millionths of a second. It also has a storage capacity for as many as a million items.

Concluding sentence

In short, unbeatable speed and unimaginable memory capacity have turned computers into the most efficient and smartest machines in the world.

What is the controlling idea of this BP?

It is the incredible speed of computers, along with their memory capacity, which makes them so useful and valuable. Computers can solve problems in a fraction of the time it takes man. For this reason, businesses use them to keep their accounts, and airline, railway, and bus companies use them to control ticket sales. As for memory, modern computers can store information with high accuracy and reliability. A computer can put data into its memory and retrieve it again in a few millionths of a second. It also has a storage capacity for as many as a million items. In short, unbeatable speed and unimaginable memory capacity have turned computers into the most efficient and smartest machines in the world.

Essentials of a Body Paragraph

1

Unity/Cohesion

All the ideas in a paragraph must focus on the main idea. The supporting ideas must develop a single main idea only. If any sentence in a paragraph does not relate to the main idea, the paragraph will lose unity.

2

Coherence

Along with unity, paragraphs should demonstrate paragraph coherence. Just as “adhere” means for things to stick together, “cohere” means, for a paragraph, that the elements in the paragraph should “stick together.” There are five elements that

you should consider to ensure coherence:

Logical order of events

Parallelism

Transitional expressions

Key concept repetition

Substituting pronouns for nouns

Time Order

It is helpful to order the ideas in your paragraphs with a sense of time.

Time is important in all of our lives.

The following paragraph develops the ideas chronologically (“chronos” means “time” and “logic” refers to “order”—so “chronologically” means “time order”).

Phil had an important dinner meeting with a client at 7 P.M. At 8 A.M., Phil took his car into the dealer for repairs. After an hour’s wait, the service technician explained the repairs necessary to fix the damage. By 10 A.M., Phil had talked to the service manager to get an estimate on the costs. Phil called his insurance agent at 10:30 A.M. to see if the bill was covered under his policy. Phil returned to the dealer’s at 6 P.M. and picked up his car. He made it to the restaurant on time for his dinner with the client.

Space Order (Direction)

Sometimes, the physical space(directions) in which the events are unfolding is important and should be emphasized.

Depending on the direction you are describing, you can move from top to bottom, left to right, inside to outside, or any appropriate “direction.” Consider the following paragraph for its space order in describing a field from a distance to close-up:

The tall fir trees surrounded the open field. At the base of the trees, small shrubs ringed the green expanse like a floating fence. The field was dotted with blue “heal-all” flowers. On many of the flower petals, small beads of dew glistened in the morning sun. Tiny insects swam in the dew drops as if lounging in their own backyard pool.

Order of Ideas

If you were to explain to a friend how to logon to ChatGPT, you would not explain the process with ideas given in the following order:

1. Write

<https://openai.com/index/gpt-4o-and-more-tools-to-chatgpt-free/> in URL

2. Give prompt to the bot.

3. Click on 'Try ChatGPT'.

4. Connect your email account with the bot by providing the existing email address and password.

Transitional Expressions

As you move from one idea or event in a paragraph, it is helpful to the reader if you link these ideas and events with transitional expressions. You may have already experienced some of these devices in other chapters where they are labeled coordinating conjunctions, adverbial conjunctions, introductory words, and subordinating conjunctions.

The Relationship	The Transitional Expression
Results	as a result of . . . , consequently, therefore, thus, because
Comparison	in comparison, similarly, likewise
Contrast	in contrast, but, however, although, otherwise
Examples	for example, namely, another . . . , for instance, namely
Sequence	first . . . , second . . . , third . . . , next, then, also, finally, lastly, additionally, further more, soon

Practice

The pilot took off from the airport in bright sunshine. The storm clouds on the horizon were thick and black. The small plane began to dip and shake. The winds from the approaching storm buffeted the small craft. The pilot struggled to keep the plane aloft. She called the airport tower for advice. She increased her speed. She headed the plane into the wind. The plane responded to the controls. She landed the plane safely at her destination. She called the tower personnel and thanked them for their help.

The pilot took off from the airport in bright sunshine; however, the storm clouds on the horizon were thick and black. Soon, the small plane began to dip and shake because the winds from the approaching storm buffeted the small craft, and the pilot struggled to keep the plane aloft. First, she called the airport tower for advice. Next, she increased her speed. Then, she headed the plane into the wind. As a result, the plane responded to the controls. Afterwards, she landed the plane safely at

Key Concept Repetition

In longer works, because you are expressing so many ideas, it is vital that you keep the reader focused on the topic. One technique that will help you to accomplish this task is to repeat key concepts and words. Usually, the key concepts are expressed through your nouns: people, places, and things.

Example:

When trying to find a job, two tools are vital to the process if you hope to have any chance of success. First, complete a resume listing your education, work history, and personal attributes, such as hobbies and social and charitable organizations to which you belong. Along with your resume, write a letter of application. The letter of application, unlike the resume, summarizes your education, work history, hobbies, and social and charitable organizations and tailors them to the specific job for which you are applying. In this way, the resume and letter of application work together to give the prospective employer a more complete picture of you, your talents, and how they might fit with the job and the company.

Substituting Pronouns for Key Nouns

Another method for achieving coherence is substituting pronouns for key nouns. The prefix pro- means “for,” as “standing in for” or “representing.” So, a pronoun is a word that can stand in for or represent a noun. Some commonly used pronouns are he, she, it, you, me, him, her, us, them, we, and they.

The children attended Patricia’s birthday party. While at the party, the children ate cake. The cake was chocolate with white icing. The children also ate ice cream. The ice cream was neopolitan, consisting of vanilla, chocolate, and strawberry flavors. The children also played games. The games included hide and seek, pin the tail of the donkey, and Twister. The children watched as Patricia opened her presents. The children also received a present for attending the party. The party was a great success. All the children had a wonderful time at the party.

Development of the Ideas

It means that every idea discussed in the paragraph should be adequately explained and supported through evidence and examples.

Example:

□ First of all, a friend must not tell lie. He must always tell me the truth and he must be honest because if there is honesty between two friends, their relationship will last until death. In addition to honesty, helping or being near a friend on a bad day is very important. Another point to consider is that he must criticize me if I make a mistake.
