

CONCLUDING PARAGRAPH

JAVERIYA AHMED HUSSAIN

INTRODUCTION

Conclusions too often fade out because writers feel they are near the end and the task is over. Use your conclusion to drive your central idea home one final time. Make sure your conclusion has the same energy as the rest of the essay. It should create a sense of completion.

Bring the reader back to the place s/he started from. It should have a circular approach. Refer back to your motivator.

Conclusion Structure

COMMON METHODS OF CONCLUSION

END WITH A SUMMARY

**INCLUDE A THOUGHT
PROVOKING QUOTATION**

END WITH A PREDICTION

**END WITH A
RECOMMENDATION**

SUMMARY

An essay that ends with a summary is not very different. After you have stated your thesis ("Tell them what you're going to tell them") and supported it ("Tell them"), you restate the thesis and supporting points ("Tell them what you've told them"). However, don't use the exact wording you used before.

EXAMPLE

Online shopping at home, then, has several advantages. Such shopping is convenient, saves money, and saves time. It is not surprising that growing numbers of people are doing the majority of their shopping on the Internet for everything from turnip seeds to televisions.

INCLUDE A THOUGHT-PROVOKING QUOTATION

A well-chosen quotation can be effective in re-emphasizing your point.

EXAMPLE

Rude behavior has become commonplace and needs to stop. People no longer treat each other with the respect and courtesy they should. People talk on their cell phones at inappropriate times and places. Cutting off other drivers in order to save mere seconds happens more and more often. As the Dalai Lama said, "Love and kindness are the very basis of society. If we lose these feelings, society will face tremendous difficulties; the survival of humanity will be endangered."

END WITH A PREDICTION

A prediction or recommendation encourage the reader to continue thinking about the essay. A prediction states what may happen in future.

EXAMPLE

It is believed that as many as two million people are currently undiagnosed with celiac disease, or gluten sensitivity. There is currently no medication to cure the disease. If doctors disregard patients who complain of symptoms of the disease, serious physical damage can occur. But if doctors listen to their patients and administer the appropriate tests, proper diagnosis can be made in a timely manner.

Add a Recommendation

A recommendation suggests what should be done about a situation or problem:

Stereotypes such as the ditzy blonde, harried executive, and annoying in law are insulting enough to begin with. In magazine ads or television commercials, they become even more insulting. Now these unfortunate characters are not just being laughed at; they are being turned into hucksters to sell products to an unsuspecting public. Consumers should boycott companies whose advertising continues to use such stereotypes.
