

Revising & Editing

Javeriya Ahmed Hussain

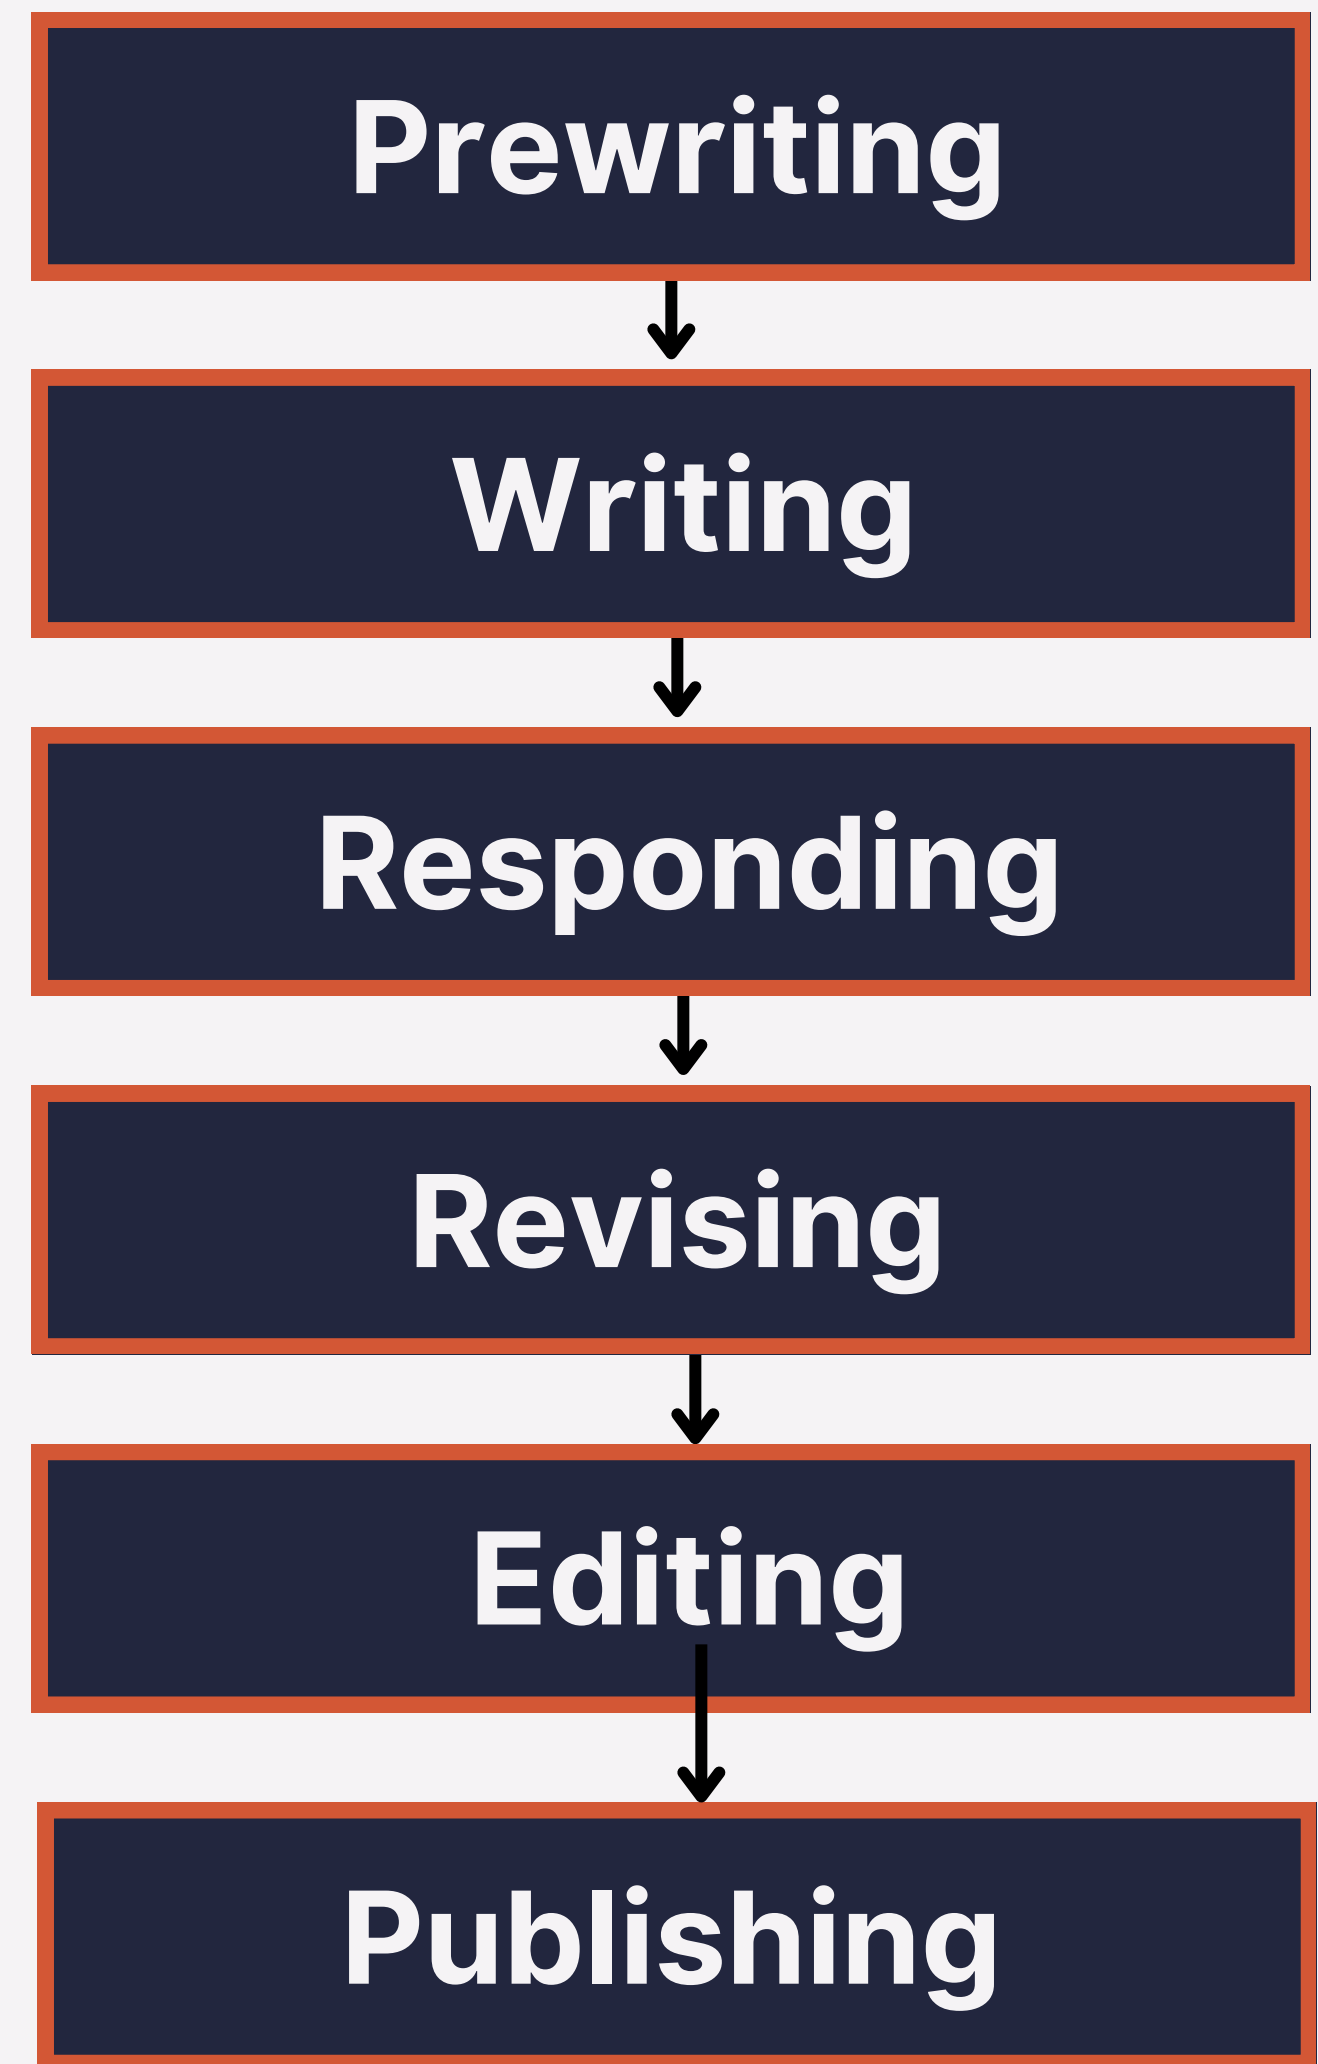

Introduction

Revising and editing play a pivotal role in enhancing the overall quality of your writing. When you revise and edit, you do more than simply correct errors. This final stage in the writing process allows you to refine and clarify your ideas. Attention to revising and editing will help elevate the overall quality of your writing, making it more compelling, coherent, and effective. Writers achieve a true grasp on their topic at this stage. They can easily frame a proper thesis statement and check if the topic sentences are related to the thesis.

Writing Process (pg. # 78)

3 Important Elements for Revision

Coherence

Maintains logical and orderly connection of ideas

Support

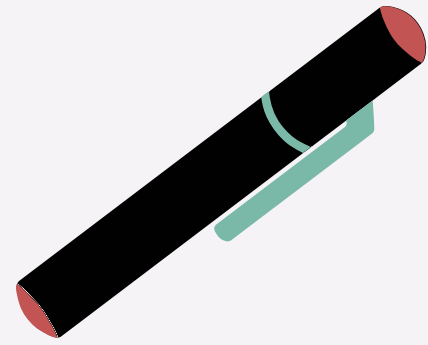

Provides backing for thesis and topic sentences

Unity

Ensures a single central idea through:

- a. Sequence of ideas
- b. Appropriate connectors
- c. Repetition of key words
- d. Consistent pronoun and verb tense references
- e. Parallel grammatical structures

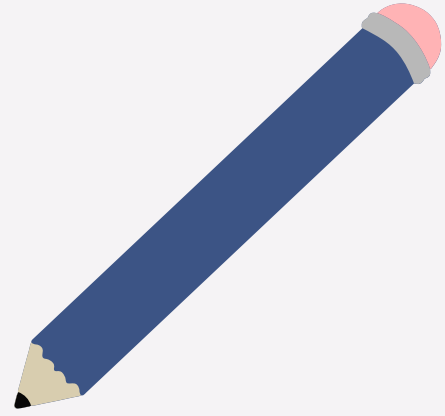

Revision Strategies

When you revise, focus on the content. During revision, be sure to evaluate your thesis and strengthen it if necessary. Also, make sure that your argument is coherent and that the evidence supports your thesis. To help with the process, you can create a reverse outline. The first step in creating a reverse outline is to read the essay and outline the main points in each paragraph. When the outline is done, check to see if each paragraph focuses on a single topic and is related to the main idea. Use the outline to help you make needed revisions.

Editing

Editing focuses on sentences and grammar-syntactic errors, grammatical errors, and punctuation mistakes are corrected.

Editing Strategies

During the editing stage, you will focus on sentence level corrections. This is the time to look for mistakes in grammar, spelling, punctuation, and capitalization. There are several things you can do to help you find those mistakes. First, try reading the draft aloud to help you identify mistakes. Next, read backward, starting from the end and work your way to the beginning to help you focus on individual words and sentences. Finally, change the font or color of your text. This change can help you read the draft from a different perspective.

Revising & Editing Checklist

Questions to Consider

- Does my essay answer the writing prompt?
- Did I include a thesis statement?
- Do my paragraphs begin with topic sentences?
- Did I include enough supporting evidence?
- Are my paragraphs organized logically?
- Did I use transition words and phrases?
- Are my sentences complete?
- Did I use appropriate punctuation?

Sample is on pg. 120 and 121
